Multifunctional Putty

Characteristics

4CR 2300 is a high quality 2-component polyester universal Putty for smoothing irregularities in the car refinishing sector, vehicles and mechanical engineering.

Professional quality with excellent adhesion on iron, steel, galvanized metal, aluminium, glass fibre and carbon fibre reinforced compounds.

Highly filling by fine grain composition, maximum stability on vertical surfaces, no cracking on the edges by fine sanding, will give a compact, smooth surface of top quality.

V.O.C. Value

EU limiting value for the product (cat. B/b): 250 g/l (2007)
This product contains max. 4 g/l VOC (0.03 lbs/gal)

Tech Tip

Insufficient or an excess use of hardener can result to a stained overcoat.

Application

Drying
Object Temp. 20°C: Sandable dry or wet after approx. 25 min.

The substrate must be clean, dry and free of grease.

Sand the surface. Remove old thermoplastic coats (NC- or 1K-acrylic paints), synthetic resins as well as acid-containing products (eg. Washprimer).

Once 2300 has dried, it can be recoated using all customary paint systems.

if needed cover putty areas with 4CR Filler.

Example 4270 or 4280 Premium Filler
