Parking Sensor Masking Discs

Characteristics

The fast and sure way to save time masking integrated parking sensors and rubber seals. Parking Sensor Masking Discs are specially designed to mask parking sensors without the need for removal. Our adhesive cover protects the sensor throughout the repair process preventing damage from sanding, painting and polishing. This saves time and also reduces the risk of problems or malfunctions with the sensors afterwards.

Tech Tip

- fold over the little flap before use on the sensor
- Attach the parking sensor
- Remove the sensor after the flash off time of the painting process,
- NOT after drying!

Technical Data

Carrier	Polyester Film
Adhesive	High Temperature Silicone
Packaging	Sleeve of 60 discs, 20 discs per sheet
Adhesive Thickness	38 micron
Total disc thickness	88 micron (without liner)
Temperature	200°C
Diameter	18 mm

Storage and Transportation

One year shelf life from date of receipt by customer when stored at 22°C (72°F) and 50% relative humidity.
