6400

Hand Cleaner

Characteristics

4CR 6400 will be found where the various surfactant-based skin cleaners fail.

Varnishes, resins, adhesives, bitumen and water-repellent soils cannot be removed and removed from the skin by the use of surfactants.

Therefore, organic solvents are even less used in these troubleshooting steps.

4CR 6400 acts as controversial dirt Ester oils with very good skin tolerance. The other ingredients such as surfactants and the polyethylene friction body are optimally tailored to the relationship of the product.

The key is the protective acid mantle of the skin treatment, moisturizing trust for its own nourishing effect.

Tech Tip

At the beginning there is no need for moistening first with water.

Application

In order to get the best out of the product, there is no need for moistening the hands first with water.

The dirt is then rubbed together with the past hand cleaner 6400, then moisten a little with water in the washing process.

Then wash hands thoroughly under running water.

Afterwards care must be taken within drying your Hands.
