Dust Mask FFP2 with valve

Characteristics

Dust Mask FFP2 oneway is an extremely light (10 g per mask) and reliable protection against fine dust.

The comfortable fit, as well as the adjustable nose clip and elastic band provide maximum wearing comfort during work.

They are perfectly suited for sanding and grinding work.

Dust Mask FFP2 complies to the latest European Norm EN149:2001, Class FFP2.

Dust Mask FFP2 against harmful fine dust of the particle filter class 2.

These products do not protect the user from gases, vapours and solvents during spraying.

Tech Tip

Type of filter class: FFP2

Type of air pollution: Only for use against solid aerosols of low toxic and carcinogenic dusts and smoke.

Function: Contact with soft wood, glass fibres, metal work, working with plastics (other than PVC), welding work.

Application

As shown in the picture, pull the mask over your mouth and nose and fasten it with the rubber bands on the back of your head. Squeeze nose bridge lightly for perfect fit.
