

Art.-No.: 6.7422.0400

7422

Control Spray

Characteristics

4CR 7410 is a black guide coat used to make irregularities visible once the putty or filler has been applied and prepared for the subsequent sanding.

Makes irregularities on the surface clearly visible.
Sanding over the area intensifies the effect.

V.O.C. Value

EC limiting value for the product (cat. B/e): 840 g/l (2007).
This product contains max. 720 g/l VOC [6.01 lbs/gal].

Tech Tip

- Fast drying
- Effective aid for making irregularities visible on filled and sanded areas
- Easy sanding and re-coating properties

Application

Substrate:

Surfaces which have been filled or where putty has been applied.

Pretreatment / Cleansing:

Pre-clean with 4CR Silicone remover. Thoroughly clean the filled areas.

Preparation:

Shake can vigorously until the mixing balls move freely!

Application:

Apply one diagonal faint coat. Do not over apply!

After use:

Turn can upside down and spray until the valve is clean, this prevents the valve from clogging up.

Processing conditions: From +10°C and up to 80% relative air humidity.

Technical Data

Colour / Grade of Gloss	black / matt
Dust dry	5 - 10 min.

Storage and Transportation

In tightly closed original containers at least 2 years shelf life.
