

Art.-No.: 6.8065.1000

**8065**

## Cutting Compound-P

### Characteristics

For fast reworking of heavily weathered paintwork, elimination of deep scratches, and effective removal of overspray and sanding traces of up to P 1500 grain. With its extremely homogeneous abrasive grain, 8065 achieves an extremely high level of cut with an excellent gloss level. Can be polished for prolonged periods without sticking and with low dust formation. Ideally suited to all types of paint (both soft and scratch-proof).

### Application

Shake before using.

Apply in a crosswise motion with a rotary polisher and a lambskin pad (sanding traces from P 1,500-2,000) or a polishing pad hard / medium (sanding traces from 1,500-2,500). Apply polishing compound at medium speed and with medium pressure. Polish afterwards with Anti-hologram polish for the best possible finish. Do not use on hot surfaces. Before using, check suitability and compatibility.

### Areas of use

Paintwork of cars, commercial vehicles, motor cycles, etc

### Technical Data

Colour	slightly orange
Odour	peach
Bottle	HDPE, 1000 ml

### Storage and Transportation

At storage temperatures of preferably 15 to 20°C original packings may be stored for 24 months. Keep from freezing!
